

Cybersecurity Total Edge Protect

Cybersecurity has quickly become mission-critical for businesses of every size. Threats are more frequent, more sophisticated, and constantly evolving—and few organizations have the time, tools, or expertise to keep up on their own. As a result, many small and mid-sized businesses rely on ad hoc solutions and policies that leave them vulnerable.

Visual Edge IT delivers enterprise-grade cybersecurity managed services that level the playing field. By layering advanced monitoring, automation, and expert oversight, we protect every single endpoint—from email, identities, applications, and cloud services to servers, desktops, copiers, and printers.

Prevent Disruption from Cyber Threats

The best defense in cybersecurity is staying on offense. Visual Edge IT continuously monitors your environment, hunting for threats and responding automatically when risks appear—supported around the clock by security experts. By identifying and containing issues early, we stop small incidents before they turn into business-disrupting events.

See Your Entire Security Environment Clearly

You can't protect what you can't see. Our unified security approach provides a single, real-time view across endpoints, networks, cloud services, and applications. With clear visibility into what's happening and where attention is needed, leaders can make smarter, faster security decisions with confidence.

Leverage AI and Automation

Security alerts are only helpful if they're meaningful. We use AI-powered prioritization and automated responses to filter out the noise, surface real risks, and resolve common incidents fast. That means fewer distractions, less alert fatigue, and a security team focused on what truly matters.

Strengthen Your Security Posture Over Time

Cybersecurity is not a one-time fix—it's an ongoing discipline. Through continuous monitoring, regular assessments, and expert guidance, Visual Edge IT helps you improve your security posture over time. The result is stronger protection, better compliance support, and greater resilience as threats and business needs evolve.

Managed Services At-a-Glance

How We Protect Your Environment

Visual Edge IT uses a hardened, layered security strategy to protect your entire digital estate. We don't rely on isolated tools or occasional check-ins; we continuously monitor, prioritize, and respond—using automation, intelligence, and expert oversight—to address risks before they impact your business.

Why Choose Total Edge Protect?

-  **Single-pane-of-glass visibility across your entire security environment**
-  **AI-powered prioritization of high-impact security events**
-  **Centralized logging and reporting to support security and compliance needs**
-  **24/7/365 support from security professionals**
-  **Enterprise-grade SIEM and SOAR powered by Splunk**
-  **Integrated approach combining technology, automation, and oversight**
-  **Continuous validation to verify security effectiveness over time**
-  **Defense-in-depth protection with multiple, overlapping security controls**

Differentiators

One Trusted Technology Partner

Our support doesn't end at cybersecurity. Whether you need network and firewall management, stronger threat protection, reliable data protection, or executive-level security guidance, we'll help you build a tailored managed services solution that keeps you moving forward—with one provider, one bill, and one clear point of accountability.

Proven Experience

Visual Edge IT is one of the nation's largest managed services providers, delivering 28 solution areas. For you, that means dependable support and proven expertise—powered by 600+ subject-matter experts and 350 technical certifications.
