

VISUAL EDGE IT

ADVANCED ENDPOINT PROTECTION

ADVANCED ENDPOINT PROTECTION

from Visual Edge IT is a complete endpoint security solution that addresses the needs of small to medium businesses.

Is your small to medium business looking for threat protection, remediation, incident response, or the resources to staff a security operations center?

We've got your back.

Endpoint security monitors SMB environments, detects malicious threats and quickly remediates the attack, reducing risk to your business. All that with the 24/7 support from our experienced SOC service.

With coverage from multivariant ransomware attacks to the latest cryptomining infiltrations, advanced endpoint threat management coupled with SOC monitoring and remediation services stop active threats and minimize harm.

KEY BENEFITS

On-demand security operations

Threats and attackers target SMBs the same as big enterprise firms leveraging the same tactics. A SOC that scales the protection with your business enabling you to focus on growing your business while Visual Edge IT provides the staff to drive remediation of threats.

Simple deployment, always available threat coverage

With a single agent, detect all known and unknown threats leveraging the latest behavioral based technology, regardless of where your endpoints are deployed (office, home, airport, café, hotel, etc.).

Next-gen threat detection and remediation

Visual Edge IT incorporates the SentinelOne platform with its patented threat identification and remediation technology. Fully protect desktop and server environments for Windows, Mac and Linux operating systems as well as virtualized servers in AWS, VMWare, Citrix, VirtualBox, and Hyper-V.

Ransomware peace of mind

The SentinelOne platform provides a \$1M warranty to cover costs for Ransomware in the unlikely event that it is unable to protect or remediate. While it is not likely Ransomware will ever impact you when your business is supported by Visual Edge IT, it's nice to know that you are covered.

KEY FEATURES

Complete SOC services

Implement advanced operations without the need for in-house security expertise. The complete Visual Edge IT SOC analyzes quarantined applications and files, reducing false positives and ensuring comprehensive protection. We take care of the labor challenges while you focus on growing your business.

Threat detection

Rapidly recognizes many thousands of virus and malware attack variants including cryptomining attacks as well as the root causes of these malicious behaviors by quickly identifying and diagnosing corrupt source processes and system settings.

Response and remediation

When malicious behavior is detected, Visual Edge IT Endpoint Security will quickly rollback files to previous safe versions through tracking changes in the devices and restoring to an acceptable risk state.

Next-generation endpoint security

Visual Edge IT Endpoint Security utilizes the patented SentinelOne platform, for its unique malware detection and remediation technology. This solution incorporates the industry's most innovative prevention, providing visibility into the root causes and origins of the threat, reversing the malicious operations and remediating them at an agile speed, when needed.
