Spend less. Produce more. Go anywhere.

SOLUTIONS FOR
CLOUD
COMPUTING

CONFIDENT CLOUD MIGRATION

For today's businesses, especially Small- and Medium-sized Businesses (SMBs), migrating to the cloud reduces costs, reduces risks, ensures server availability and simplifies disaster recovery while maintaining connectivity and productivity.

With solutions in the cloud, businesses are able to sidestep the major investments required to secure data, buy equipment, train staff, and provide ongoing maintenance for their technology infrastructure. That's why many businesses are making cloud a higher priority to protect their

data, keep systems up-to-date, and support remote work environments.

Visual Edge IT's experienced engineering team will help you plan your move, migrate your infrastructure, and provide IT services with 24/7 end user support and remote monitoring.

Visual Edge IT has been supporting customers for more than two decades and our 90 locations across the United States bring our customers personalized local service.

PRACTICAL

Cloud services and solutions don't need to be managed in-house. Seriously, you don't need to hire staff or train employees or take time away from your day-to-day business to effectively maintain your cloud.

PRODUCTIVE

Get best-in-class cloud-based apps, intelligent cloud services and advanced security — enabling users to work from anywhere, at any time, on any business device — desktop, laptop, tablet or mobile phone.

BUDGET FRIENDLY

Benefits like lower power and electricity costs and little to no need to replace hardware make a move to the cloud cost-effective.

Visual Edge IT's cloud solutions are secure and reliable, improve connectivity and productivity, reduce physical infrastructure, are flexible and fast, are easily updated, and, frankly, just cost less.

- Quickly scale up or down to meet changing needs
- Web and mobile versions of business apps
- Email and calendaring
- File storage and sharing
- Teamwork and communication
- Secure remote access to in-house applications
- Advanced security for managed and unmanaged devices
