SOLUTIONS FOR
HIPAA
SECURITY

HIPAA SECURITY FOR COMPLIANCE

HIPAA security is not something that can be compromised. You not only need to secure your environment but also ensure privacy and integrity.

The regulations are many. Not only do you need to train employees and implement business associate agreements, you must also assess your network, identify and address security risks, publish policies and procedures all while be vigilant over patient complaints, employee mistakes or complaints, third-party errors, and data breaches. It's simply a lot!

Visual Edge IT engages best practices and has the solutions and expertise you need to meet the challenges of HIPAA compliance for your technology environment. With access to more than 350 experts across the country, including over 30 Tier 3 engineers, your infrastructure will be meticulously managed.

Visual Edge IT has been supporting customers like you for more than two decades and our 90 locations across the United States bring our customers personalized local service.
