CISO

VIRTUAL CHIEF INFORMATION
SECURITY OFFICER SERVICES

CYBERCRIME IS INTENSIFYING

To most every business, cyberattacks and ransomware are nothing new. They're just more common, more sophisticated... and more complex to guard against.

By the numbers, 130 different ransomware strains have been detected since 2020 alone, according to VirusTotal. Worse, strains like GandCrab, Windows-based executable files, dynamic link libraries and others, says Verizon, are now behind a quarter of all data breaches worldwide. The result is that cybercrime is now a *\$10 trillion business*.

Yet while more than 40% of cybercriminal activity is currently aimed at SMBs, only 14% of the businesses in this vital sector are prepared to defend themselves.

CISO TO PROTECT YOUR BUSINESS

The Chief Information Security Officer (CISO) services from Visual Edge IT guard your small- to medium-sized business from potentially crippling cyberattacks and ransomware. CISO also enables organizations in regulated industries to stay in compliance with new and existing regulatory guidelines — continuously — and even helps your business obtain cybersecurity insurance.

As the CISO experts at Visual Edge IT (VEIT) become your own dedicated cybersecurity team, your business gets ongoing, responsive guidance from every angle.

INCIDENT RESPONSE TEAM

Rapidly assess, quarantine, and respond to an attack or cyber incident to stem damage to your organization and data.

VEIT PARTNER NETWORK

Get certified audits of your regulatory compliance frameworks from VEIT and its qualified security team.

BUDGET FRIENDLY

Work with our experts who hold the highest security certification – Certified Information System Security Professional (CISSP).

EASILY LAUNCH WITH VIRTUAL CISO

Implementing or enhancing a cybersecurity initiative is never easy for any business, particularly those with little or no budget for in-house security staff. Visual Edge IT eases the pain of getting started with a clear, well-defined path to launch Virtual CISO services.

1. Establish access to Virtual CISO to assist you with all aspects of data security.
2. Perform an *Infrastructure Security Review* audit to determine a baseline foundation of your organization's security maturity.
3. Create an *Incident Response Plan* as required for all compliance and cybersecurity insurance.
4. Conduct quarterly audits to track improvements in your company's security maturity score.

CISO... AN EASY CHOICE

As cyberattacks and ransomware become increasingly more frequent and harder to prevent, Visual Edge IT and its Virtual CISO services are an easy business decision.

To protect your operations, information, and customer data, CISO gives you:

- Cybersecurity expertise, via CISSP-certified security experts
- A full view of security maturity throughout your organization — and how to maximize it
- Systematic certified audits for continuous security improvements
- Rapid access to a dedicated Incident Response Team should an attack or cyber incident occur

For you as a decision-maker concerned with cyberattacks and data security, you get:

- A trusted security advisor, along with network of security experts
- A security road map for the future, both short-term and long-term
- The confidence of meeting compliance requirements, continually
- *Peace of mind*, knowing your business is always protected

Contact us to learn more about Virtual Chief Information Security Officer (CISO) services, and to get 24/7 remote monitoring, live U.S.-based support desk services, and security for all of your IT operations with Managed Security Solutions from Visual Edge IT.
